**Summary of Legislation:** (CCR Amended) This bill requires a child care provider who is licensed or who receives Child Care and Development Fund (CCDF) reimbursement to maintain documentation concerning age appropriate immunization status of children in the provider's care.

**Effective Date:** July 1, 2002.

**Explanation of State Expenditures:** This bill requires that licensed child care providers and providers with enrolled CCDF voucher recipients to maintain documentation of immunization for children in their care. This bill adds the varicella vaccine and conjugated pneumococcal vaccine to a list of age appropriate immunizations to be determined by the State Department of Health (SDOH) as required for enrollment at one of these centers. Depending upon the determination by SDOH, this requirement may place increased pressure upon state health programs to provide additional vaccines for some children. In addition, the Family and Social Services Administration may incur some administrative costs associated with monitoring the compliance of these new requirements among licensed providers.
